## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 29, 30, 37, 42 and 46 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Glowka (US 5,343,968) (see “earth removal member” 14, “fluid passage” 15 and “secondary fluid passage” 43; and column 6, line 43 through column 8, line 29).
3. Claims 29, 30, 32, 37, 40, 41, 42, 43 and 46 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Runia et al (US 2004/0238218) (see “earth removal member” 1, “fluid passage” 9a and “secondary fluid passage” 20,65,66; and paragraphs [0042]-[0061]).

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 29, 30, 32, 37 and 40-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee (US 2004/0011566) in view of Runia et al '218 or Glowka '968.

Lee discloses the invention as claimed except that it is not disclosed in Lee that the lost circulation material can be a physically alterable bonding material. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use such a physically alterable bonding material to control lost circulation of drilling mud because it is well known in the art to use a cementitious material to control lost circulation during a drilling operation as evidenced by Runia et al (see paragraph [0004]) or Glowka (see column 1, line 62 through column 2, line 12).

#### ***Allowable Subject Matter***

6. Claims 31, 38, 39 and 47-52 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoang Dang whose telephone number is 571-272-7028. The examiner can normally be reached on 9:15-5:45 Monday-Friday.
